Summary

Seasoned software developer, working remotely, with over fifteen years of experience in startups and small teams. I am a hard-working generalist who operates autonomously and delivers fast.

Experience

Full Stack Developer

GetSite

Feb 2024 - Present (1 year+)

Building an AI-powered website builder from the ground up. Users describe what they want and the platform generates fully functional websites. Responsible for the full stack - backend services, frontend application, infrastructure, and AI integration.

Tech stack: TypeScript, Node.js, React, AI/LLM integration, AWS, MongoDB.

Game Developer

Haunted Tower

Jan 2022 - Jan 2024 (2 years 1 month)

Designed and developed a tower defense game from scratch, built with TypeScript and Phaser 3. The game runs on web and mobile platforms via CapacitorJS. Handled all aspects: game design, development, deployment, and publishing.

Tech stack: TypeScript, Phaser 3, CapacitorJS, HTML5 Canvas, JavaScript.

Full Stack Engineer

eDRV

Mar 2020 - Dec 2021 (1 year 10 months)

Worked on building an API platform that helps businesses and application developers easily integrate EV charging with a variety of enterprise applications.

Tech stack: JavaScript, Node.js, MongoDB, React, OCPP, AWS, Microservices, DevOps.

Full Stack / Blockchain Developer

Eloquentix

Apr 2014 - Mar 2020 (6 years)

Collaborated closely with clients, and helped them develop products in various stages. Worked on projects from zero (MVP), as well as production-ready, large scale ones.

Tech stack: JavaScript, Node.js, AngularJS, Solidity, Python, MySQL, Cassandra, Apache Mesos, Docker, Rancher, Ethereum.

Founder / Full Stack Developer

Hostero

Jan 2018 - Jan 2020 (2 years 1 month)

Developed the product from scratch (infrastructure + software) and managed the whole operation, using this opportunity to develop my soft and marketing skills.

Tech stack: JavaScript, Node.js, AngularJS, React.js, TypeScript, MySQL, Docker, Rancher.

Back-end Developer

Simply Social

Mar 2013 - Jun 2013 (4 months)

Implemented highly scalable and available applications and workers for crawling and aggregating social media accounts.

Tech stack: Python, RabbitMQ, MySQL.

New Media / Full Stack Developer

MMT

Sep 2011 - May 2012 (9 months)

Created and maintained microsites on Microsoft Sharepoint and built web applications for learning management systems.

Tech stack: PHP, MySQL, JavaScript, HTML, CSS, Microsoft Sharepoint.

Co-Founder / Mobile Developer

Codeboxed

Nov 2010 - May 2012 (1 year 7 months)

Worked on developing mobile applications, and was a contributor to the Appcelerator Titanium community and one of the first certified developers.

Tech stack: PHP, JavaScript, MySQL, Objective-C, Cocoa Touch, Titanium.

Full Stack / Mobile Developer

Eloquentix

Apr 2009 - May 2011 (2 years 2 months)

Developed web applications and native iPhone applications for various clients.

Tech stack: PHP, JavaScript, MySQL, Objective-C, Cocoa Touch.

Licenses & Certifications
